

Straight teeth are so beautiful!

You can look better - so simple

The HarmonieSchiene® lays on your teeth as smoothly as contact lenses on your eyes. The approved system from Orthos aligns leaning teeth - simple and invisible.

With the help of the flexible, removable HarmonieSchiene® the frontal teeth can be corrected also during adulthood. The aligner is invisible for others and does not interfere with your daily life.

*By the way...  
...even kissing is possible!* 

Just ask your Dentist - he or she will be glad to help you!

What would you like to change at your teeth?

First you and your dentist define the aim: the optimal alignment of your teeth.

In the Specialized Dental Laboratory Orthos the necessary steps will be programmed into a small series of clear aligners.

These transfer the required movements in small steps onto your teeth until they have reached the desired result.

All you have to do is wearing the aligner the whole day - apart from eating and brushing your teeth. And in a few weeks or month you smile even brighter...

Just ask our team for more details. We are looking forward to advising you and accompany your treatment.

before treatment

afterwards: nice and aligned

*You will feel much better!*
